Softwareverteilung – Uninstall Microsoft Office 2019

Da bei einer Installation von MS Office XXXX „über“ eine Installation von MS Office 2019 leider Reste der „alten“ Installation erhalten bleiben, wird DRINGEND empfohlen, zuerst MS Office 2019 zu deinstallieren.

ToDo

- Kopie des heruntergeladenen Paketes an einen beliebigen Ort auf dem Server z.B. nach `\\server\Softwareverteilung_Kopiervorlagen`
- Ausführen der Datei **copy_MS_Office_2019_uninstall.bat**. Folgendes wird automatisch ausgeführt:
 - Kopie der Deinstallationsdateien nach `\\server\Softwareverteilung\Microsoft\Office_2019_uninstall`
 - Entfernen der Gruppenrichtlinienobjekte von Office 2019
 - Entfernen der admx- und adml-Dateien von Office 2019 aus dem CentralStore
 - Entfernen von Verknüpfungen und Batch-Dateien
- Kontrolle des Aufrufs von `MS_Office_2019_Uninstall_ProPlus.bat` in `\\[PDC]\netlogon\Hilfe.bat` und **entfernen** eines ev. vorhandenen Installationsaufrufs.

```
rem Aufruf der Hilfe-Batchdatei durch startpc.bat
rem fuer ev. Installation von RB-Server-Patches

rem Diese Datei bitte nicht löschen!
